Minot Public School Foundation Classroom Innovation Grant

Great teachers help students become great. Research shows that an inspiring teacher is the most important school-related factor influencing student achievement. Innovative education grants provide classroom resources for creative projects not funded by district, state, or federal funds. This allows educators to pilot a new idea or supplement something they are already doing in the classroom.

Donate online! For tracking purposes, add “NDASFAA” in the comment box of the donation page. Cash or check will also be accepted during the conference.

BUILD AN INNOVATIVE CLASSROOM. BUILD A FUTURE.

THANK YOU to our conference exhibitors for your continued support!
